

# Aluminum Test Panel Sign Off Sheet

Due to the nature of Aluminum, it can easily show scratches and surface abrasions. ChemInstruments tries to do its best to minimize these marks. Unfortunately we cannot control the material before we receive it or after we ship it to our customers. We do provide a protective film covering on the side of the panel determined by our technicians to be as scratch free as possible. ChemInstruments strives to supply the best material possible, but we cannot guarantee aluminum panels will arrive blemish or scratch free.

This sheet is sent to all customers that order Aluminum Test Panels. Please sign and date this document to acknowledge receipt and understanding of the nature of the aluminum panels we supply.
